

## Why Hire an IT Services Firm?

By outsourcing specific IT services, you free up your staff and you for revenue-generating opportunities and the business of the business. Your organization can tap on-demand talent, depth of experience, ample resources and huge economies of scale at a lower cost compared to doing IT in-house.

## Building World-Class IT Infrastructure to Grow Your Business

Comprehensive services are important to ensure that critical IT systems are always available to support core business functions. Maintaining IT systems with an in-house IT staff can be costly and leave you without expertise in the latest technologies. InData has services to address your ongoing IT management and support needs. Our Managed IT Services provide regular management of systems and networks that keep your PCs, Macs, servers and networks up and running. We'll build the right IT plan to optimize your business, minimizing downtime and maximizing productivity.

### InData Managed IT Services

1. Free Your People to Focus on Core Business Functions
2. Tap Greater Efficiencies and Economies of Scale
3. Tame Runaway Operating Expenses
4. Access Highly-Specialized Talent
5. Tap Resources On-Demand Without Breaking the Bank
6. Improve Productivity
7. Reduce Downtime
8. Gain a Competitive Edge
9. Attract and Retain Employees
10. Access Otherwise-Unavailable Vendor Support

## vCIO

A highly experienced IT strategist who knows your technical environment inside- out. Provides a strategic analysis of your IT investment and how it aligns with your business priorities.

## Server, PC, and Mac Management

We offer comprehensive server and desktop management to proactively update, back up and manage all of your computers and servers remotely. Every aspect of the network is monitored so issues can be detected before causing a problem.

## Server Backup Solutions

Server crashes can affect any business. Our server backup solution uses an easy-to-deploy dedicated local appliance that incorporates local backup, cloud backup, and object-level exchange restore, and offers a local and cloud server business continuity option.

## Virtualization

InData can transition your servers to a virtualized environment allowing for reduced hardware costs, increased flexibility of your systems and additional data security options. You can reduce the number of servers you have in production, which will save on upgrade and energy costs.

## IT Support

Even the most stable and monitored IT systems can develop problems that need to be addressed. We can remotely access your organization's IT systems and initiate remote support to address problems as they arise. When remote support isn't enough, our engineers are available for onsite visits to assess problems and make repairs.
